

The Kingdom of Fungi Taw Caw Scavenger Hunt

- Stop, look, and [listen](#) for the songbird called the ruby-crowned kinglet which we have seen on several walks.
- With all this rain, many varieties of fungi are emerging: look for turkey tails, split gill mushrooms, and others.
- Look for lichen—leafy green things that are not moss. Some have red fruit.
- Look to see how buds studied previously have changed.
- Another sign of spring is pollen (the yellow stuff is from pine trees).
